IBRAHIM KEITA

Cloud Operations | Systems & Infrastructure Support
301-844-8645 | ibrahimkeita70@gmail.com | Prince George's County, MD

PROFESSIONAL SUMMARY

IT and systems support professional with nearly two years of enterprise experience across Active Directory, Microsoft 365, endpoint deployment, and escalated troubleshooting. Currently building and failure-testing AWS infrastructure hands-on, including a multi-AZ auto-scaling web tier using IAM roles for S3 access with no static credentials. Studying for the AWS Certified Solutions Architect – Associate. Seeking cloud support, cloud operations, or junior cloud engineering roles.

CERTIFICATION

- AWS Certified Solutions Architect – Associate (SAA-C03) — in progress, exam targeted February 2027
- Planned: AWS Certified Developer – Associate; AWS Certified AI Practitioner

TECHNICAL SKILLS

Cloud (AWS): EC2, Auto Scaling Groups, Launch Templates, Application Load Balancer, Target Groups & Health Checks, S3 (bucket policies, Block Public Access), IAM (roles, policies, instance profiles), Security Groups, Multi-AZ design, EC2 Instance Connect, AWS CLI

Systems & Identity: Active Directory, Microsoft 365, Intune, user account and access management

Operations & Support: ServiceNow, ticket triage and escalation, imaging and workstation deployment, remote support, VPN

Platforms: Linux (Amazon Linux 2023), Apache/httpd, Bash and EC2 user data scripting, Windows

AWS PROJECT (SELF-DIRECTED) — HIGHLY AVAILABLE, SELF-HEALING WEB TIER

- Built a fault-tolerant web tier on AWS: an internet-facing Application Load Balancer distributing traffic across an Auto Scaling Group of EC2 instances in two Availability Zones.
- Implemented least-privilege access to a private S3 bucket using an IAM role and instance profile scoped to a single bucket ARN, with no access keys or static credentials stored on any instance.
- Automated provisioning with a Launch Template and user data script that installs Apache and pulls content from S3 at boot.
- Enabled ELB health checks on the Auto Scaling Group so that application-level failures, not just failed hosts, trigger instance replacement.
- Validated resilience by terminating an instance in one AZ and confirming automatic replacement and re-registration.
- Troubleshot connectivity failures by distinguishing connection timeouts (security group and network layer) from connection refusals (application layer), and traced a failed boot-time S3 pull to a missing IAM instance profile.

EXPERIENCE

Systems Technician | Kyndryl (Contract) *Nov 2025 – Jul 2026*

- Resolved and closed a high volume of technical support tickets for an on-site enterprise client.
- Imaged and deployed workstations across the organization using enterprise imaging and deployment tools.
- Provided systems support and troubleshooting for enterprise infrastructure.

Business Development Specialist | Honey Leaf Platters *Nov 2025 – Present*

- Built a prospect database, sales tracker, and pipeline dashboard as the company's sole business development function.
- Ran outbound outreach across DC, Maryland, and Virginia, engaging decision-makers and sending catering proposals.
- Built pricing and menu materials for corporate catering offers and handled supply and inventory logistics.

Information Technology Administrator | OTT HydroMet (Contract) *Jul 2025 – Oct 2025*

- Administered day-to-day IT operations, including hardware, software, and systems maintenance.
- Managed user accounts and access in Active Directory and supported Microsoft 365.
- Served as primary point of contact for IT requests, including remote support and VPN access.

IT Support Specialist II | Bloomberg Industry Group (Contract) *Nov 2024 – Jul 2025*

- Handled escalated technical issues beyond first-line support, resolving high-priority problems.
- Partnered with engineering teams to troubleshoot complex hardware, software, and systems issues.

Data Entry Specialist | Maryland-National Capital Park and Planning Commission *Feb 2020 – Jul 2024*

- Maintained accuracy and integrity of departmental records over a 4.5-year tenure, identifying and correcting data discrepancies.

EDUCATION

Associate of Science, Aerospace Engineering | Montgomery College *Nov 2025*
