IBRAHIM KEITA

Cloud Operations | Systems & Infrastructure Support

301-844-8645 | ibrahimkeita70@gmail.com | Prince George's County, MD | ArchitectKeita.github.io | github.com/ArchitectKeita

PROFESSIONAL SUMMARY

IT and systems support professional with nearly two years of enterprise experience across Active Directory, Microsoft 365, endpoint deployment, and escalated troubleshooting. Has built, failure-tested, and documented four AWS projects, from a multi-AZ self-healing web tier to serverless event-driven systems, the latest defined entirely in Terraform. Studying for the AWS Certified Solutions Architect – Associate. Seeking cloud support, cloud operations, or junior cloud engineering roles.

EDUCATION & CERTIFICATION

- Associate of Science, Aerospace Engineering — Montgomery College, Nov 2025
- AWS Certified Solutions Architect – Associate (SAA-C03) — in progress, exam targeted February 2027

TECHNICAL SKILLS

Cloud (AWS): EC2, Auto Scaling, Application Load Balancer, S3, EBS, Lambda, DynamoDB & Streams, API Gateway, SNS, EventBridge Scheduler, CloudWatch Logs, Bedrock, IAM (least-privilege roles and conditions), Security Groups, Multi-AZ design

IaC, Tooling & Platforms: Terraform, AWS CLI, Python (boto3), Bash, Git/GitHub, Linux (Amazon Linux 2023), Apache, cloud-init / EC2 user data, Windows

Systems & Identity: Active Directory, Microsoft 365, Intune, user account and access management

Operations & Support: ServiceNow, ticket triage and escalation, imaging and workstation deployment, remote support, VPN

AWS PROJECTS (SELF-DIRECTED) — code and write-ups at github.com/ArchitectKeita

Job Search Tracker, built entirely in Terraform | *Terraform, Lambda, DynamoDB, API Gateway, Bedrock, SNS, EventBridge*

- Defined 32 AWS resources in Terraform, deployed with one apply; the tracker logs applications from Gmail automatically, sends daily follow-up reminders and a weekly summary, and is in daily use.
- Designed AI email parsing with a pattern-matching fallback, so emails were still processed correctly when a new-account Bedrock quota throttled the model.

"Was This You?" Card Fraud Alerts | *Lambda, DynamoDB Streams, SNS, API Gateway*

- Built a real-time pipeline that scores card transactions against four fraud rules and emails an alert whose button locks the card; swipes are idempotent and alert links single-use.

EBS Snapshot Automation with Fail-Safe Cleanup | *Lambda, EventBridge Scheduler, EBS, IAM*

- Nightly Lambda that snapshots tagged volumes and deletes only its own snapshots, enforced in code and by an IAM tag condition; proved with decoy snapshots that survived cleanup.

Highly Available, Self-Healing Web Tier | *EC2, Auto Scaling, ALB, S3, IAM*

- Multi-AZ web tier behind an Application Load Balancer with ELB health checks; terminated instances to confirm automatic replacement with no downtime.
- Diagnosed three silent failures, including a missing shebang that caused cloud-init to discard the boot script while instances still passed EC2 status checks.

EXPERIENCE

Systems Technician | Kyndryl (Contract) *Nov 2025 – Jul 2026*

- Resolved and closed a high volume of technical support tickets for an on-site enterprise client.
- Imaged and deployed workstations organization-wide and supported enterprise infrastructure.

Business Development Specialist | Honey Leaf Platters *Nov 2025 – Nov 2026*

- Built a prospect database, sales tracker, and pipeline dashboard as the company's sole business development function.
- Ran outbound outreach across DC, Maryland, and Virginia, engaging decision-makers and sending catering proposals.

Information Technology Administrator | OTT HydroMet (Contract) *Jul 2025 – Oct 2025*

- Administered day-to-day IT operations as primary point of contact, including remote support and VPN access.
- Managed user accounts and access in Active Directory and supported Microsoft 365.

IT Support Specialist II | Bloomberg Industry Group (Contract) *Nov 2024 – Jul 2025*

- Resolved escalated issues beyond first-line support, partnering with engineering teams on complex systems problems.

Data Entry Specialist | Maryland-National Capital Park and Planning Commission *Feb 2020 – Jul 2024*

- Maintained accuracy and integrity of departmental records over a 4.5-year tenure, identifying and correcting data discrepancies.
